As a recent graduate of the Iron Yard Academy/Orlando, my skill sets are based on cutting-edge knowledge of Front End Development using innovative technology. I have been successfully trained on completing projects with proficiency and accuracy, earning high remarks on both my efficiency and quality of work.

EDUCATION

The Iron Yard Academy, Orlando, FL

Front-End Development, Mar 2015

- The Iron Yard Academy is an intensive code school that exists to train and mentor their students into professional programmers. The Front-End course teaches students to learn how to build in-browser applications using HTML, CSS and Javascript. The Iron Yard curriculum is constantly evolving to meet the standards of today's technology, giving students the required skills to continue to learn and develop their talents for a lifetime beyond graduation.

James W. Robison Secondary School, Fairfax, VA

High School Diploma, May 2009

- Business & Marketing DECA Student - DECA prepares emerging leaders and entrepreneurs in marketing, finance, hospitality and management in high schools and colleges around the globe.

ReadyRead Web Application

readyread.firebaseio.com

Readyread is a web application a fellow developer and I founded and created while attending school. The application allows users to browse news articles by various categories and let's them filter by read time.

A user can set personal goals, create new goals, track their number of words/time read, save articles and more. ReadyRead is still has many features to come and is always being tweaked and expanded.
